

ZOHRA GARBADAWALA

Software Engineer II | .NET, Azure & AI-Assisted Development
Melbourne, VIC | +61 0477389956 | zohragarbada@gmail.com
LinkedIn: [linkedin.com/in/zohra-garbadawala](https://www.linkedin.com/in/zohra-garbadawala)

Professional Summary

Software Engineer with 8+ years of experience designing and delivering scalable, cloud-native applications using .NET and Microsoft Azure across enterprise and desktop environments.

Strong expertise in C#, REST APIs, microservices, and distributed systems, with a proven track record of improving system performance, scalability, and delivery efficiency. Experienced in leveraging AI-assisted development tools to accelerate engineering workflows, enhance code quality, and optimise complex systems.

Core Skills

Languages: .Net, C#, TypeScript, JavaScript, SQL

Frameworks & Backend: .NET 8/Core, ASP.NET Web API, Entity Framework, LINQ, Microservices

Frontend: Angular, WPF

Cloud & DevOps: Microsoft Azure (Functions, Service Bus, Azure SQL), CI/CD, Azure DevOps

Data & Reporting: SQL Server

Tools: Visual Studio, VS Code, Git, Azure DevOps, SSIS, SSRS, SSMS

AI & Emerging: AI-assisted development, prompt engineering, code refactoring using AI tools

Professional Experience

Software Developer II – Lumivero (Melbourne, Hybrid)

Sep 2022 – Present

Project: NVivo

- Architected high-performance RESTful APIs and Azure Functions supporting global workflows
- Improved API response times by 25% through optimization
- Implemented serverless Azure architecture for scalability
- Used AI tools for legacy code refactoring, improving speed by ~30%

- Integrated Claude Code for deep legacy code analysis and refactoring, accelerating development velocity by approximately 30%
- Leveraged AI-assisted development tools for legacy code analysis, refactoring, and optimisation, improving development efficiency and reducing manual effort

Sonia – Student Placement Management System

Sonia is an enterprise platform used by universities to manage student placements, including scheduling, compliance tracking, supervisor coordination, and reporting.

- Designed and enhanced a scalable architecture for a student placement management system, supporting complex workflows across institutions, supervisors, and students
- Improved system performance and maintainability by modularising backend services and optimising API interactions
- Implemented structured data flows between desktop (WPF) and web APIs to ensure consistency and reliability
- Contributed to system scalability and long-term maintainability through clean architecture and reusable components

Software Development Engineer – Exxat Pvt Ltd

Jan 2018 – Aug 2022

- Engineered core modules for a global education platform using .NET Core and Angular.
- Architected Azure-based integrations and reporting pipelines using Azure SQL and Service Bus.
- Led the Product Support team, establishing new protocols that significantly improved issue resolution turnaround.

Education

Bachelor of Information Technology (Computer Engineering)

Gujarat Technical University – 2017
